Zastava AK47 M21 Straight Pull .223 Rifles

£ 1,230

Description

Brand new Serbian Zastava M21 SBS rifles are modernised, upgraded versions of famously known "Serbian Kalashnikov" M70 assault rifle. This NATO calibre version was adopted as standard weapon by Serbian Special Forces and features stainless steel bolt and bolt carrier, black polymer furniture including tactical handguards with Picatinny rails and side-folding buttstock. The M21 rifles are based on super strong RPK LMG stamped receiver, which is 1.5mm thick, instead of 1mm used to build the older AKMs. The barrel is made by cold forging and is chrome plated, which guarantees long service life and exceptional accuracy. Picatinny dust cover is hinged to the front trunion with a built-in flip-up rear iron sight. In accordance with the UK law requirements, M21 rifles were manufactured as straight-pull (single-shot) rifles. Our package includes ONE steel 30-r magazine and manuals in English. The 5.56x45 M21 rifles can only operate with unique M21 magazines (Normal AK magazines will NOT fit!)
